SUMMARY

Cybersecurity A.A.S. graduate focused on offensive security, with hands-on Hack The Box experience (Master rank, 42 machines) in network reconnaissance and web application testing, plus a working background in enterprise Windows environments (Active Directory, Microsoft Entra ID, endpoint security). Pursuing the HTB Certified Penetration Testing Specialist (CPTS) and CompTIA Security+, both expected December 2026. Seeking a Junior Penetration Tester or Security Analyst role.

SKILLS

Offensive Security: Burp Suite, Nmap, ffuf, SQLMap, BloodHound, Metasploit, John the Ripper

Networking & Analysis: Wireshark, network reconnaissance, vulnerability assessment, web application security

Scripting: Python, Bash, PowerShell

Systems: Linux (Kali, Parrot), Windows, virtual machines, Active Directory, Microsoft Entra ID, CrowdStrike, Wazuh, Fortinet, Meraki

CERTIFICATIONS

HTB Certified Penetration Testing Specialist (Expected December 2026) | CompTIA Security+ (Expected December 2026) | Microsoft Office Specialist: Excel Associate

PROJECTS & LABS

- Hack The Box: Master rank (Level 64); 42 machines, 10 challenges, 1 Sherlock, and 25+ offensive modules completed; CPTS path 90% complete.
- Bash IP and port scanner: wrote a script to scan hosts and open ports.
- USB HID device: set up a Raspberry Pi Pico as a Rubber Ducky-style device (from an open-source GitHub project) that emulates keyboard and mouse input to run commands in the background; tested with a harmless payload in a lab.
- Wazuh SIEM lab (team school project): helped deploy Wazuh and an agent on a Windows host; performed the password brute-force attack and analyzed the captured logs.
- Portfolio and methodology: built a GitHub Pages portfolio (jlflores007.github.io/Portfolio-Website) and an Obsidian template for structured assessment notes.

EXPERIENCE

Greater Chicago Food Depository, Chicago, IL

August 2025 – July 2026

IT Support Intern

April 2026 – July 2026

- Supported an enterprise Windows environment (over 50 users), administering Active Directory accounts and Microsoft Entra ID groups and helping roll out SSO and MFA for Box.
- Performed supervised Nmap network scans to support infrastructure visibility, and documented results in audit records.
- Monitored CrowdStrike and Meraki dashboards and assisted with Fortinet firewall deployment and configuration.
- Managed the endpoint lifecycle, including provisioning 100 laptops, Windows 11 upgrades, reimaging, secure offboarding, and hardware disposal.
- Built a Python/Pandas GUI application that automated workflows for the Development team, saving an estimated 5 hours per week.

Data Research Evaluation & Analytics Intern

August 2025 – March 2026

- Built a Power BI dashboard analyzing 10,000+ volunteer records, contributing to a 12% reduction in no-show rates; cleaned and anonymized datasets with Python (Pandas).

United Airlines, Chicago, IL

February 2024 – August 2024

Loyalty & Marketing Data Analytics Intern

- Wrote SQL queries in PostgreSQL to analyze 50k+ flight transactions and cleaned and loaded 100k+ records into AWS sandbox tables.

EDUCATION

Wilbur Wright College, Chicago, IL

January 2024 – May 2026

Associate in Applied Science, Cybersecurity | GPA: 3.4 | Presidential Scholar 2024–2026

Year Up, Chicago, IL

Data Analytics Training Program | Earned 31 ACE-recommended college credits

August 2023 – August 2024
